RSA SecurID® Access
Immediate options for Remote Working

TD Tech Data®

Ensure business continuity and security with SecurID® from RSA
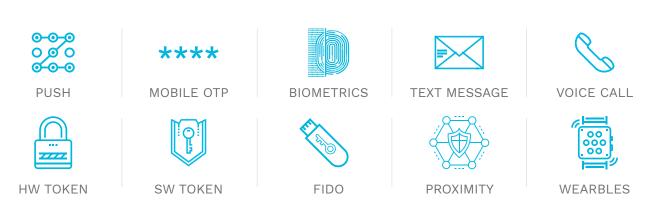

With a spike in demand for remote working during this period of uncertainty, how can your business make sure all your workforce remains secure?

For a rapidly increasing number of businesses, remote workers are temporarily becoming a necessity to ensure business continuity. As the demand for secure remote working rises, to ensure it's continually successful you must be able to provide secure access to all applications and network resources in a convenient manner.

RSA SecurID® provides organisations with the ability to quickly roll out convenient and secure access anywhere, on any device through a flexible range of modern authentication options:

Modern Authentication
Security and convenience for a mobile and dynamic workforce

PUSH	MOBILE OTP	BIOMETRICS	TEXT MESSAGE	VOICE CALL
HW TOKEN	SW TOKEN	FIDO	PROXIMITY	WEARBLES

Business Continuity Licenses for crisis situations
Existing SecurID® Access Customers

Request your RSA SecurID® Business Continuity Licenses

RSA's Business Continuity License (BCO License) has been created in preparation for times when the demand for remote working is increased unexpectedly. The license can be activated when a situation arises that means you'll need to temporarily enable more users on RSA Authentication than your license edition typically allows, at a significantly reduced cost, providing a temporary boost to your selected edition licenses.

Who can apply for BCO licenses?

BCO licenses are available to all RSA SecurID® edition license holders immediately.

How do I activate my BCO licenses?

Simply purchase BCO to add it to your existing servers and instantly see the license count increase.

3 Editions of licenses available

There are three editions of licenses available within the RSA SecurID® Next Generation Authentication platform, to cover all sizes of organisations and security requirements. Adding BCO licenses is a quick and effective way to temporarily support a spike in home working requirements.

RSA SecurID® Access - Editions (with BCO)

3 Editions	Base	Enterprise	Premium
1. What edition you need based on what you want to protect?	VPN & traditional on-prem agents	VPN & traditional on-prem agents	VPN & traditional on-prem agents
